ECG Report Conclusion

Name : test151026 Gender : Female Age : 5

1.Normal sinus rhythm
2.Premature Supraventricular Contraction (PAC)
3.Counplet of PAC
4.Supraventricular tachycardia
5.Premature Ventricular Contraction (PVC)

*1. Due to the sporadic and transient nature of ECG events, it is normal for each measurement result to be different. It is recommended to increase the frequency of monitoring and capture incidents on time.

*2. The results of this analysis are only for reference in daily heart health monitoring, they cannot replace the medical diagnosis results and cannot used for clinical diagnosis and treatment.
